SUMMARY

I am a creative and passionate software developer with over 2 years of experience building high-performance applications. I specialize in modern JavaScript frameworks to transform ideas into engaging user experiences and excel in developing responsive web applications while optimizing backend processes for efficiency and reliability. I am dedicated to continuous learning and collaborative teamwork.

Key Achievements

- **Forex ERP System Development**
Successfully engineered and deployed a Forex ERP system, significantly enhancing operational efficiency and effectiveness in currency transactions.
- **Cost Savings through Website Development**
Generated substantial savings for the company by designing a Forex website from scratch, eliminating the need for costly third-party services.
- **Telegraphic Transfer (TT) Process ERP Development**
Developed a Forex Remittance ERP to manage Telegraphic Transfers (TT) with secure booking, KYC onboarding, compliance checks, and real-time forex rate integration.

EXPERIENCES

Software Engineer | Zenith Forex Online pvt ltd | August 2023 – July 2025 | Delhi

A company specializing in online forex trading and financial services

- Engineered and deployed responsive web applications, delivering scalable UI, secure backend APIs, and optimized database performance, improving page load speed by 30% and system reliability by 40%.
- Built a Forex ERP system with modules for Currency Purchase & Sale (automated profit/loss, live exchange rate APIs, manual overrides) and a Banking Transactions Module (deposits, withdrawals, commissions, wire transfers, and reconciliation with actual bank statements).
- Created a Forex Remittance Web Application for Telegraphic Transfers (TT), featuring role-based access control, KYC onboarding (ID, passport, visa, address verification), TT booking workflows, compliance checks (RBI LRS, AML alerts), and reporting dashboards for branch performance, agent activity, and profit/loss tracking.
- Designed a Forex website from scratch, boosting lead generation by 35% and saving the company ₹10L annually by eliminating third-party service costs.
- Implemented internal business modules such as a Career Management Page for recruitment workflows and a Conveyance Management Module with invoice upload, approval/rejection workflows, and cross-project database Configuration for payment processing.
- Integrated third-party APIs (e.g., NSDL PAN API, live forex APIs) to enhance application functionality and ensure secure transactions.

Tech Stack: - HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React.js, Redux, PHP, Node.js, Express.js, MongoDB, PostgreSQL, MySQL

INTERNSHIPS

Frontend Developer | Arudan Technology | July 2022 – September 2022 | Prayagraj

-

- Made a responsive web pages using HTML, CSS, and JavaScript.
- Gained practical experience in front-end development and user interface design.
- Collaborated with team members to improve UI/UX and ensure cross-browser compatibility.
- Learned the basics of code structuring, debugging, and performance optimization.

CERTIFICATIONS

- **Frontend Development — Certificate**, Arudan Technology January 2022 – June 2022
- **MERN Stack Development — Certificate**, Ducat (The IT Training School) March 2023 – July 2023

EDUCATION

- **MCA (Masters in Computer Application)**
Integral University
- **BCA (Bachelor in Computer Application)** 2020-2023
Allahabad State University
- **ADCA (Advance Diploma in Computer Application)** 2019-2020
SRC Institute of Technology
- **Intermediate (Class XII)** 2017-2019
Satya Narayan Intermediate College

PROJECTS

Portfolio ([Github](#)) ([Demo](#))

- Developed a fully responsive personal **portfolio** using **React**, showcasing **projects**, **skills**, and **contact information**.
- Combined **GitHub** and deployment via **Vercel** for real-time updates and smooth user experience.

Tech Stack: - HTML, CSS, Bootstrap, JavaScript, React.js with some dependencies

Pokeman Kingdom ([Github](#)) ([Demo](#))

- **Designed a "Pokémon Kingdom" a responsive web page**, showcasing character cards, animations, and responsive UI components. Implemented reusable components, props handling, and interactive design for enhanced user engagement.
- Embedded external Pokémon API to dynamically fetch and display Pokémon data with search and filter functionality.
- Launched on **Vercel** for live access and testing.

Tech Stack: - HTML, CSS, Bootstrap, JavaScript, React.js

React AI Tool ([Github](#)) ([Demo](#))

- Created an **AI-powered Chat Tool (like: ChatGPT, Gemini or DeepSeek)**, enabling real-time conversational interaction with a clean and responsive UI.
- Enhanced usability with features like **scrollable chat history**, **auto-scroll**, and **input validation**.
- Deployed on **Vercel** for live access and testing.

Tech Stack: - HTML, CSS, Bootstrap, JavaScript, React.js and Tailwind CSS

Image Generator ([Github](#)) ([Demo](#))

- This **generates images** based on user-provided text **prompts**.
- Efficient rendering to ensure fast image generation.
- Deployed on **Render** for live access and testing.

Tech Stack: - HTML, CSS, Bootstrap, JavaScript, React.js, Tailwind CSS, Node.js, Express.js

Information Form Details (Login and Registration with Authentication) ([Github](#)) ([Demo](#))

- This form includes user authentication features such as **Login** and **Registration**. After logging in, each user can **view only their own details**, ensuring privacy and data security.
- Users have full control over their data, with the ability to **add**, **edit**, **update**, and **delete** their own information. Access to other users' data is strictly restricted, enforcing user-level data isolation and protection.

Tech Stack: - HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, Multer, JWT, dotenv, PostgreSQL

SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, ES-6, PHP, C, C++
- **Frameworks & Libraries:** React.js, Redux, Express.js, Node.js, jQuery, Bootstrap, Tailwind CSS
- **Database & Tools:** MySQL, PostgreSQL, MongoDB, Git, Postman, VS Code, AWS, Vercel, Render
- **Core Concepts:** Object-Oriented Programming (OOP), DSA, REST APIs, Third Party APIs
- **Operating Systems:** Ubuntu (Linux), Windows (10/11 etc.)
